

R&D: Program Update Notes

2023 Password is Required

Posted: September 22, 2023 at 5:00 AM PST

Version 2023.9.7

1. Centered adjustable shelf holes have been modified for base and tall cabinets.
2. Left and right Faceframe stiles now extend upwards automatically when a top Faceframe reveal or additional top rail width is entered.
3. A new feature allowing different depths into the sacrificial board is now available. Please study the attached video to understand how this feature should be used and how it should be set up.
4. Under some circumstances the CNC Machining Library would shut Cabinet Pro or Door Pro down. This has been resolved.
5. If you have not done so thus far in September, then you will be required to download and install **Support File 14** via *DOWNLOADS – FULL PROGRAM INSTALLATION* from www.cabinetpro.com. This Support File #14 contains 3 new videos, 2 of which are described below with the 3rd played with this update.
6. Four new qualifiers for CNC machining exist at the CNC Machining Library: Ignore the displayed machining operation if Left or Right Finished Ends exist, or ignore the machining operation if they do not exist.
7. CNC Operations may now be restricted to user-defined cabinet groups. See the video by entering “cabinet groups” in the FIND field of the Video Help Center to view this video.
8. A new video has been added that discusses the ramping feature of Cabinet Pro and Door Pro’s CNC setup. Enter “ramping” in the FIND field of the Video Help Center to view this new video.
9. Under some circumstances, rotated drawer pull holes were located incorrectly. This has been resolved.
10. Cabinet Pro LLC has changed software for remote connection to other computers. This new software will result in a 9-digit number being displayed when the “Remote Support” button is pressed. This number is to be given to the representative from Cabinet Pro in order for the representative to access your computer.
11. **Please Note: From 12 SEP to 2 OCT Technical Support will be restricted to email. If remote access to your computer is necessary, then we will schedule that task via email. Otherwise, please address any problems, questions, or technical support issues via the EMAIL SUPPORT button on the opening screen of Cabinet Pro and Door Pro until October 2, 2023.**
