R&D: Program Update Notes

Posted: March 7, 2024 at 5:30 PM PST

Version 2024.3.2

1. When changing a base cabinet into a drawer bank at the Cabinet Editor, the doors are now automatically removed but may be re-applied over the drawer fronts if needed.
2. Door Stiles are labeled Left and Right Door Stiles at the cutlist when the display options are set to separate door stiles & rails.
3. Under some circumstances, door stiles were not being consolidated. This has been resolved.
4. Room-Specific countertop and backsplash thicknesses have been moved from the Job/Room setup screen to the Global Changes screen.
5. The re-design of dovetail machining with Woodwop on Homag and Weeke machines is completed.
6. The Felder CNC Router, powered by Ver. 2 of the TPACad CNC language, continues to be re-designed.
7. Offsets are allowed on pullout guide holes as they are on drawer guide holes.
8. The Edgebanding Setup screens have been greatly enhanced. Edit your Edgebanding Setups now by selecting SETUP – MATERIAL AND HARDWARE – EDGEBANDING AND LAMINATE SETUPS or from the Job/Room Setup screen.
9. The **Last Program Update for 2023**, without the obnoxious update messages, may be downloaded via the link, www.siskiyouproducts.com/CPro2023.exe
